DEFINITIONS

All entries shall conform to these definitions for acceptances and awards to be validated by all the International Organizations granting recognition or patronage.

a) Salon Definitions:

In **open sections**, entrants can enter photos with any kind of theme: for example: people, landscape, architecture, still-life photography, digital imaging, HDR photos, etc.

Any traditional or modern photographic techniques are permitted in open, Portrait and creative sections.

Nature Definition: Photos in the Nature section shall conform to **FIAP Nature** definition.

b) FIAP Definitions:

FIAP Nature Definitions:

Nature photography is restricted to the use of the photographic process to depict all branches of natural history, except anthropology and archeology, in such a fashion that a well-informed person will be able to identify the subject material and to certify its honest presentation. The story telling value of a photograph must be weighed more than the pictorial quality while maintaining high technical quality. Human elements shall not be present, except where those human elements are integral parts of the nature story such as nature subjects, like barn owls or storks, adapted to an environment modified by humans, or where those human elements are in situations depicting natural forces, like hurricanes or tidal waves. Scientific bands, scientific tags or radio collars on wild animals are permissible. Photographs of human created hybrid plants, cultivated plants, feral animals, domestic animals, or mounted specimens are ineligible, as is any form of manipulation that alters the truth of the photographic statement.

No techniques that add, relocate, replace, or remove pictorial elements except by cropping are permitted. Techniques that enhance the presentation of the photograph without changing the nature story or the pictorial content, or without altering the content of the original scene, are permitted including HDR, focus stacking and dodging/burning. Techniques that remove elements added by the camera, such as dust spots, digital noise, and film scratches, are allowed. Stitched images are not permitted. All allowed adjustments must appear natural to the viewer. Color images can be converted to greyscale monochrome. Infrared images, either direct-captures or derivations, are not allowed.

Images entered in Nature sections meeting the Nature Photography Definition above can have landscapes, geologic formations, weather phenomena, and extant organisms as the primary subject matter. This includes images taken with the subjects in controlled conditions, such as zoos, game farms, botanical gardens, aquariums and any enclosure where the subjects are totally dependent on man for food.

- *I hereby expressly agree to FIAP document 018/2017 "Conditions and regulations for FIAP Patronage" and FIAP document 033/2021 "Sanctions for breaching FIAP regulations and the red list". I am particularly aware of chapter II "Regulations for International photographic events under FIAP patronage" of FIAP document 018/2017, dealing under section II.2 and II.3 with the FIAP participation rules, the sanctions for breaching FIAP regulations and the red list.*
